## About Geology Department

Established in 1949 (April 23) the Department of Geology, University of Dhaka started its graduate programme (BSc Pass) with the prime aim of disseminating geoscience education and thereby providing trained geoscientists to be engaged in the profession of geological mapping, surveying, exploration, extraction/ production and management of country's natural/mineral resources. The application of this knowledge thus contributes its share in the national development. To fulfill the increasing demand of professional geoscientists, curricula leading to MSc and BSc 'honors' degrees were introduced in 1957 and 1967, respectively. Until now, the Department remains the largest academia in the country that offers state-of-the-art geoscience education.
